204 San Antonio Street Hirsch-Ullmann Shoe Company

"The Store Ahead"

Announce Opening Tuesday, April Ninth

WE have delayed our opening until everything should be in readiness to carry out our idea of "The Store Ahead" as applied to the shoe business in El Paso. We extend a cordial invitation to everybody to visit our store on opening day with the assurance that there is no obligation whatever to buy. We are simply anxious that you see El Paso's newest and most modern shoe store.

## The Store--The Stock--The Service

UR new store embodies the very latest ideas pertaining to shoe stores. Every modern appliance and convenience that would add to the efficiency of our service has been installed. Our stock comprises the very latest spring styles, in all leathers and fabrics, for men, women and children. The entire stock was selected especially for El Paso's demands and the great variety offered insures customers getting just what they want. The service of the new store is not surpassed in the Southwest. Only experienced shoe people are in our

Satisfaction Or No Sale

TVEN before our opening, we want to impress on El Paso people that every pair of shoes sold here, no matter what the price, must prove absolutely satisfactory to the wearer. If for any cause whatever shoes, as they sometimes do, prove unsatisfactory, money will be refunded without question. Please keep this in mind.

## Mail Orders

We have prepared to serve out-of-town people with facility and satisfaction. We ask that people living in the El Paso territory let us know their spring shoe requirements.

Repairs For Engine Arrive; Force Increased at Deep Down Mine.

Mogollon, N. M., April 6, At the Deadwood mines the repairs for engine have been installed and the plant will resume operation at once. During the unavoidable closedown the past six weeks, a large trumage of custom ore

At the Deep Down mine the new gasoline hoist has been installed and the
mine crew increased, both property and
equipment now being in readiness to
make regular daily deliveries of ore to

the Deadwood mill. The mine is being operated under lease.

At the Erneatine Mining company the new Blake crusher has been shippped and will be placed in commission immediately on arrival. In March the mili treated 3200 tons of ore; last week, 750 tons. Precipitates for last 10 days of March are being smelted.

At the Socorro mines 1200 tons of ore

were milled during the week.
At the Treasure Mining and Reduction company 450 tons were transported from the mines and treated in the week ending March 31.

At the Oaks company, during March, a total of i33 feet of development was flone on the Pacific mine, producing 75 tons of ore, which will be packed to the Deadwood mill for treatment as soon as the customs ore bins at the latter have been emptied.

In the course of recent development work on the Trilby Group property a considerable tonnage of pay ore was accumulased and is now being transported to the Deadwood mill. Should the results be antisfactory, it is likely a lease will be let and further development inaugurated.

Work of \$2,000,000 Plant at

Douglas to Begin

Shortly.

Douglas, Ariz, April 6.—The first shipment of structural steel for the Calumet and Arizona company's new 12,000,000 smelter has been started on its way to Arizona, and within three weeks several hundred highly skilled workers, drawing large wagus, will be on the job." This information is furnished by general manager John C. Greenway, who was here for a conferby previous work. \$2,000,000 amelter has been started on its way to Arizona, and within three weeks several hundred highly skilled workers, drawing large wages, will be "on the job." This information is furnished by general manager John C. Greenway, who was here for a conference with Repath and McGregor, supervising designers of the plant.

The first shipment of steel is expected to arrive at the plant within the next few days, to be followed quickly by others. It is considered probable at the smelter that the first consignment will consist largely of the lighter

"top pieces." From Capt Greenway's statement it is certain, however, that before April has elapsed a small army of skilled workers will be in Douglas. The structural steel involved in this contract is for the most part of special design and had to be cast especially for this plant. The cost as annonuced at the time the contract was let, will be approximately \$350,000.

Preliminary work, such as leveling, pouring concrete foundations, etc., has been proceeding rapidly since the latter part of last year. As a result, Mr. Greenway stated, the ground will be in practical readiness for the beginning of steel work when the first beams arrive.

by previous work.

Mr. Humphreys will retire shortly from his official position with the company, intending to return to his home in San Francisco and later to devote himself to his private mining interests, it is stated. He will be succeeded by Edgar Collins, a well known mining man until recently connected with large properties in South Africa. Plans and bids for the 300 ton mill which the company will erect to take the place of the one destroyed several years ago by fire, will be submitted acon.

## MAKES 100 PERCENT ON ITS PRODUCTION

Calumet & Arizona Unique Among Mining Concerns of World.

Boston, Mass, April 6.-The remarkable feature of the annual report of the Calumet & Armona is the fact that it produced its copper for the 1911 year at a net cost of 53t cents per pound, placing this company in the very front rank of the vein mines of the country, in fact there is only one "porphyry" that shows lower costs, the Nevada

that shows lower costs. The Nevada Consolidated.
Calumet & Arizona now occupies the position of making more than 100 percent profit on its output, that is to say, it is now receiving a profit of 5 cents per pound above its production costs, and this on a production of 50,000,000 pounds per anatum, which rate will be maintained until its new smelter is completed, when it will increase production to 85,000,000 pounds per annum. Company is now earning about \$5.50 per share on 50,000,000 pounds production.

The Calumet & Hecla has withdrawn its 15 1-2 cent price for copper, having sold all the copper it cares to at that figure, and its asking price is now

Spot chyler, it is argued, is and will be searce for some months under any conditions, and there is actual fear of a shortage in the metal during the next fee days in the face of a revival of business in this country and renewed buying from abroad. 5-8 cents.

C. J. Rianchard, statistician for the reclamation service, left Friday night for Washington, after a visit to the Ele-phant Butte dam and the Salt river
